

Practice Project :

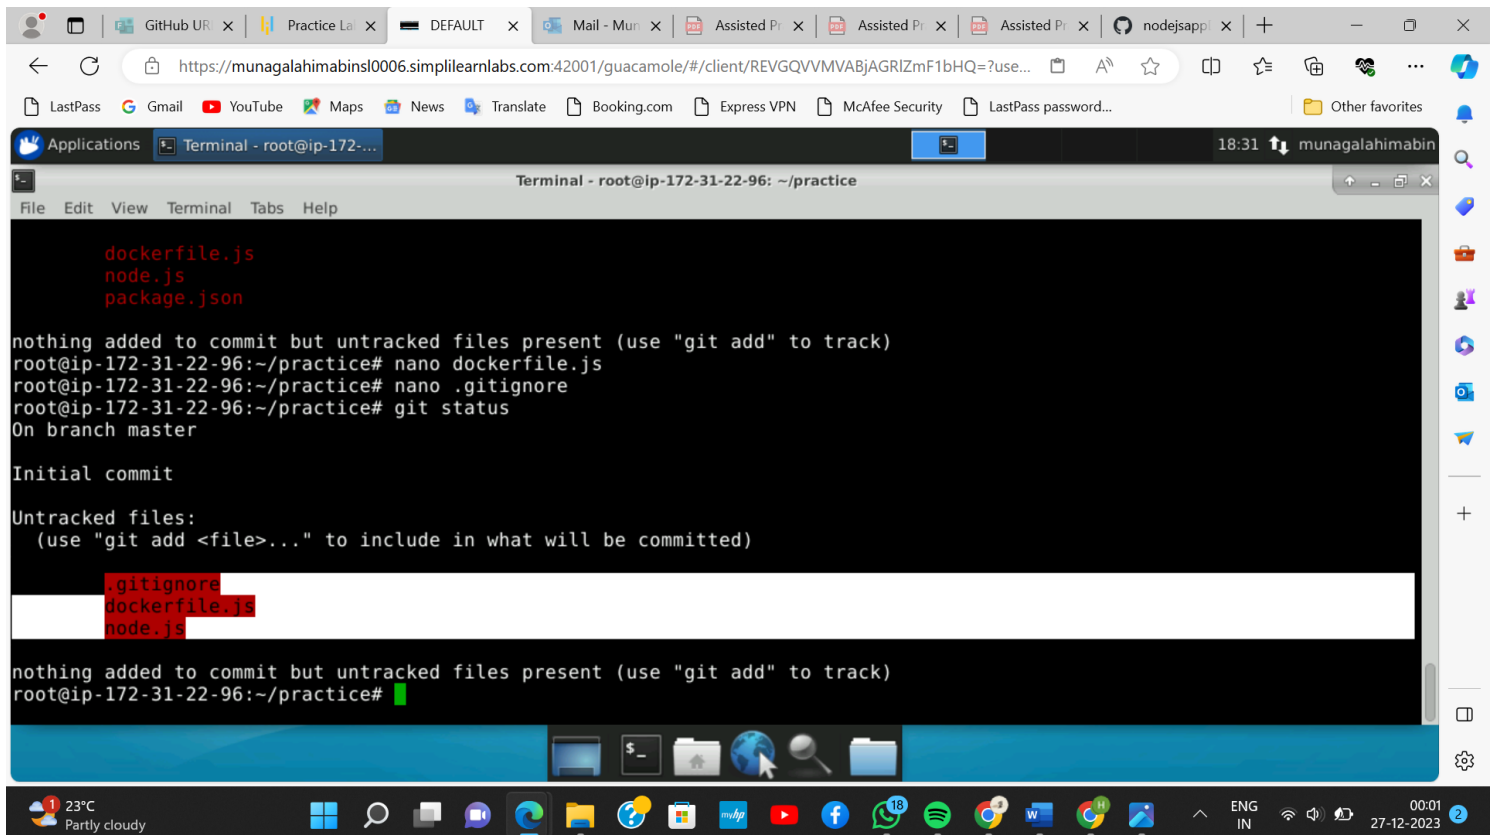

Angular Application on GitHub

Emp ID: 2587205

Name: M.Hima bindhu

Step 1: To ignore a file

1. Created a three files named dockerfile.js, node.js, package.json.
2. Added code in to it using nano <file name> command.
3. Then to ignore package.json file used a command nano .gitignore, *.json

The screenshot shows a web browser window at the top with the URL <https://munagalahimabins0006.simplilearnlabs.com:42001/guacamole/#/client/REVGQVVMVABjAGRIZmF1bHQ=?use...>. Below the browser is a terminal window titled "Terminal - root@ip-172-31-22-96: ~/practice". The terminal output shows the following commands and results:

```
dockerfile.js
node.js
package.json

nothing added to commit but untracked files present (use "git add" to track)
root@ip-172-31-22-96:~/practice# nano dockerfile.js
root@ip-172-31-22-96:~/practice# nano .gitignore
root@ip-172-31-22-96:~/practice# git status
On branch master

Initial commit

Untracked files:
  (use "git add <file>..." to include in what will be committed)

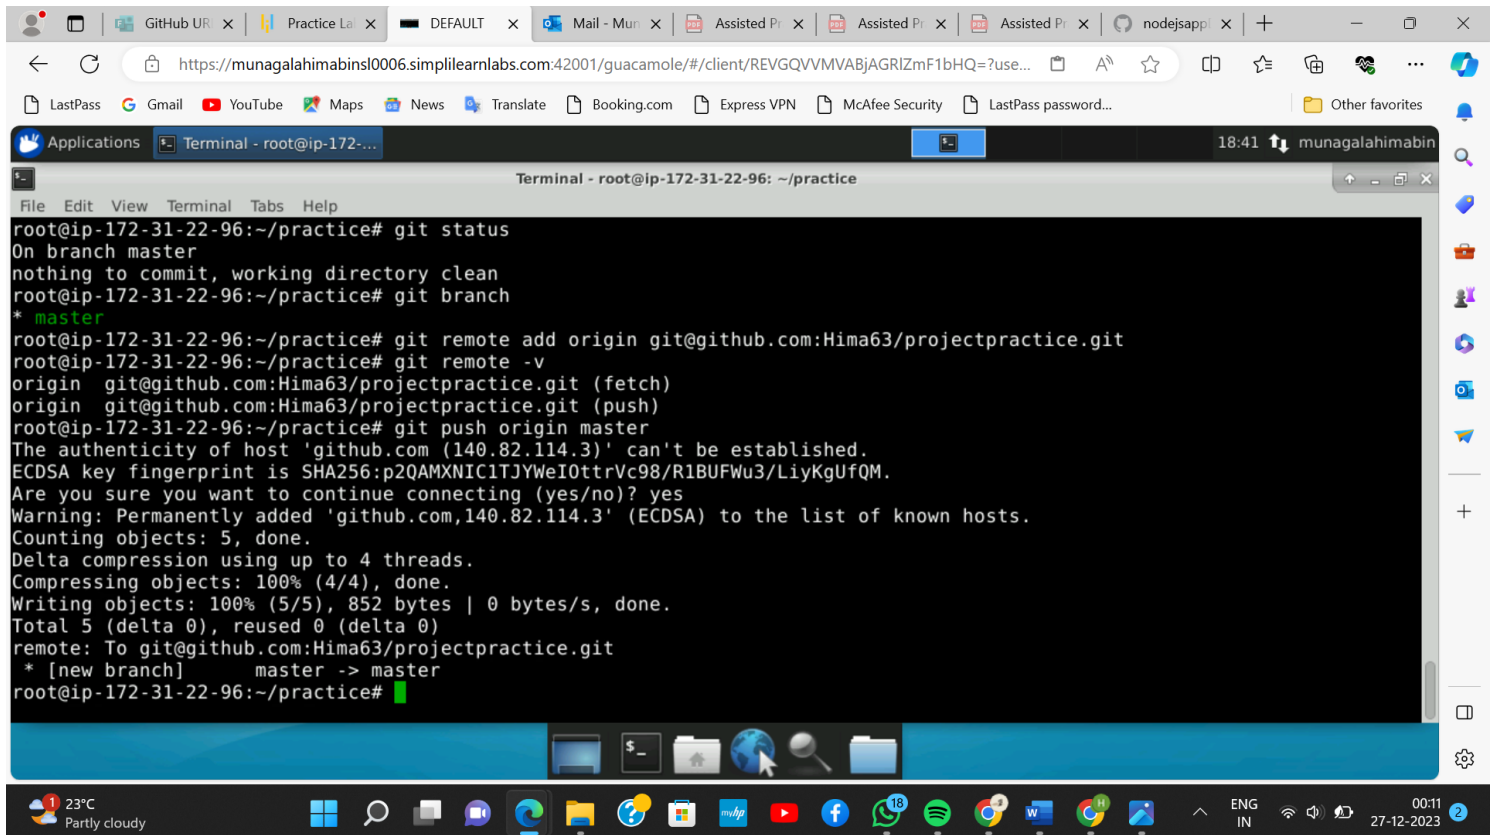

.gitignore
dockerfile.js
node.js

nothing added to commit but untracked files present (use "git add" to track)
root@ip-172-31-22-96:~/practice#
```

The terminal window also shows a list of applications on the left and a system tray at the bottom with the date 27-12-2023 and time 00:01.

Step 2: To bring(transfer) those files in to GitHub Repository

1. If you don't have a SSH Key create it or else no need.
2. Create a new repository copy the ssh link
3. Ensure you are in master branch and git status is clean
4. Do git remote add origin <paste ssh url>, git remote -v, git push origin master

The screenshot shows a terminal window titled "Terminal - root@ip-172-31-22-96: ~/practice". The terminal output shows the following commands and their results:

```
root@ip-172-31-22-96:~/practice# git status
On branch master
nothing to commit, working directory clean
root@ip-172-31-22-96:~/practice# git branch
* master
root@ip-172-31-22-96:~/practice# git remote add origin git@github.com:Hima63/projectpractice.git
root@ip-172-31-22-96:~/practice# git remote -v
origin  git@github.com:Hima63/projectpractice.git (fetch)
origin  git@github.com:Hima63/projectpractice.git (push)
root@ip-172-31-22-96:~/practice# git push origin master
The authenticity of host 'github.com (140.82.114.3)' can't be established.
